

BS/MS Student Needed To Work in the Nanoprobe/Nanotechnology Lab

I am looking for two BS/MS or BS Honors thesis students in ME or EE to work in the lab. The person should be interested in working with hands and be mechanically inclined. Also the person should have good communication skills. Research projects involve performing nanoscale experiments and analysis or fabrication of nanostructures in nanotechnology area.

The work to be carried out can be used as the course credit for electives, honors thesis or a BS/MS thesis.

If you are interested, please send a short bio, stating whether you are a junior or senior, your GPA so far and any coop & industrial/laboratory experience. I would have a preference for advanced UG students.

Prof. B. Bhushan

Ohio Eminent Scholar and The Howard D. Winbigler Professor
Director, Nanoprobe Laboratory for Bio- & Nanotechnology and
Biomimetics (NLB²)
